EXPERIENCE

Berlin, Germany
Apr 2022 – Jan 2024

Software Engineer Frontend
Voxalyze GmbH –

- Took over the majority of frontend development, primarily focusing on a React web application, also proficient with Typescript and REST API's integration and made key decisions in the development of new features for the web-app and UX/UI design, informed by real-time user metrics.
- Implemented and maintained the reusable UI components, user management sections and multiple dynamic data dashboards.
- Implemented Tanstack/Query and Axios custom hooks for user and app related data and cubeJS with Recoil (storing dynamic cubeJS queries) and Recharts for graph and table dynamic datasets.
- Maintained code quality through continuous analysis using SonarQube.
- Managed general data storage efficiently initially with Redux, later transitioning to the Recoil library.
- Enhanced the visual appeal of the app using the TailwindCSS.

Berlin, Germany
Apr 2020 – Mar 2022

Frontend Developer
Deutsche Fintech Solutions

- Contributed as part of an agile team to a React web application, engaging daily with distributed teams.
- Developed and maintained the reusable UI component library, addressed technical debts and introduced new features.
- Participated in transitioning from GraphQL to TanStack/Query and Axios.
- Played a significant role in the migration from the mono-repo to micro frontend services with TypeScript, where I took ownership of a specific micro frontend service and managed multiple secondary projects within the company.
- Led the establishment of code-quality standards using ESLint, ensuring a secure codebase with 'npm audit,' and effectively responding to SonarQube's automated static code analysis reports in collaboration with another frontend engineer.
- Implemented efficient form management and validation by integrating Formik with Yup.
- Improved UI development through the use of Storybook.
- Refined the user interface using styled-components.

Jun 2017 – Oct 2018

Freelance Graphic Designer
Upwork & DesignCrowd

- Developed designs and logos used for business card, posters, web-design and banners.
- Retouched and restored images based on the needs of the client using Adobe Photoshop and Adobe Illustrator, collaborating with clients and consistently meet deadlines and requirements.
- Designed web pages for companies launch/re-launch.

Bucharest, Romania
Jan 2017 – Jul 2017

Customer Service Representative (EN)
TELUS International

Project: Telecommunication Company
- Delivered personalised customer experiences by actively listening to their needs and demonstrating genuine care.
- Adapted to evolving customer needs, utilising data analysis and problem-solving techniques to provide effective solutions.
- Enhanced communication skills and keyboard proficiency.
- Maintained a commitment to delivering exceptional service and achieving targets, even when high workloads.

Bucharest, Romania
May 2011 – Dec 2011

Sales Agent
Telekom Romania

- Used solid arguments to prospective customers selling telecommunication products and services.
- Performed cost-benefit analyses of existing and potential customers.
- Maintained positive business relationships to ensure future sales.

EDUCATION

Bucharest, Romania
Sep 2019 – Mar 2020

Javascript Full Stack Bootcamp
Wild Code School

- Participated in a contest event hosted by Wild Code School Bucharest on meetup.com, alongside 250 other participants, by implementing a Single Page Application (SAP) following strict requirements and solving multiple carefully selected collections of JS exercises on the following platforms: codeacademy.com, codewars.com, and sololearn.com, and won a full-stack JavaScript scholarship.
- Studied the following topics:
  - Project management framework: Agile Methodologies
  - Distributed version control: Git (GitHub)
  - Operating system: Unix (Unix Shell)
  - Web technologies: CSS3, HTML5, Javascript (ES6)
  - Application programming interface: REST API
  - Javascript frameworks: React, Node.js
  - Javascript libraries: JWT, Express, Bootstrap, Material-UI
  - Databases: SQL, MySQL

Bucharest, Romania
Oct 2018 – Dec 2018

Web Fundamentals I
Academia Credis

- A total of 10 laboratories, with 2 laboratories per week of 2 hours each.
- Studied the following topics:
  - Implementing a static web application based on specifications using HTML, CSS and JavaScript / jQuery.
  - Installing and configuring open-source libraries in a web application.
  - Developing in a web environment with HTML and CSS validation tools, IE, FF Mozilla and Google, Chrome browsers and related extensions.
